Project Title: People for Animals

Objective of the project:

The People for Animals platform aims to upgrade and establish facilities for animal rescue and rehabilitation such as shelters, ambulances, mobile-clinics and helplines.

The goal of our project is to place all the adoptable animals into loving homes and to rescue wildlife animals if found injured.

Our objective is to prepare a web-platform, which will maintain data of the animals and provide a user-friendly interface for retrieving rehabilitation related details with accuracy.

This platform facilitates the addition of new animals, updating the record after adoption, helping adopter to choose right pets for them, keeping and updating records of donations and expenditures, keeping record of all the adopters, record of medications provided.

Scope of the project:

According to present scenario the condition of animals is degrading day by day due to various factors such as deforestation, floods, forest fire and other human activities. This project at global scale will help the animals by uniting people from different area who are willing to work for welfare of animals.

Software Requirements:-

Operating System : Windows 10

Programming Language : Python, HTML, CSS, JavaScript, MySQL, Php

Tools : Notepad++, Flask, Chrome, DBeaver

Under Guidance of:

Name: Abhinandan S.P

Designation: Assistant Professor

Department: CSE
